

REDESIGN YOUR WORK SPACE

3 Steps for Designing a Work Space You'll LOVE

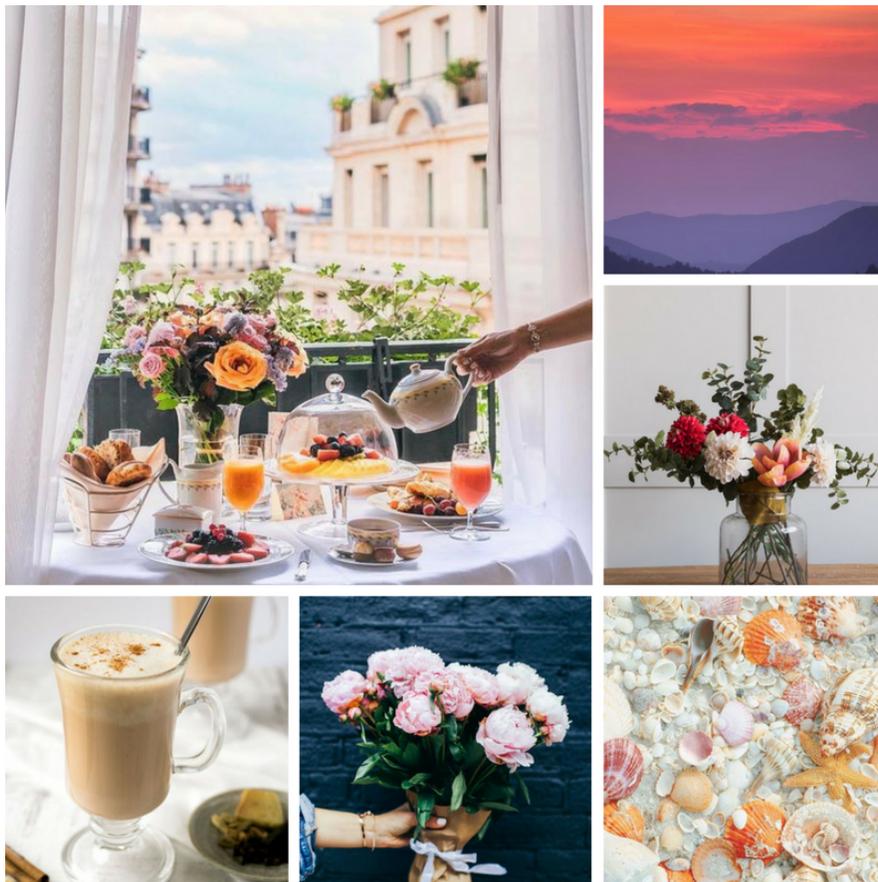

www.youraestheticstyle.com

MOODBOARD VS. VISION BOARD

WHAT'S THE DIFFERENCE??

Mood boards are a visual expression of a certain feeling, vibe, or theme. It should evoke different senses: taste, smell, sight etc.

A vision board is for visualizing what you want to bring into your reality. For example, an office vision board would include images of actual work spaces you'd like to have.

DESIGN YOUR WORK SPACE MOOD BOARD IN 3 STEPS!

- 1) Answer the 5 questions (pg 6) thinking of your work space.
- 2) Find an image for each word.
(TIP: Take time to find an image that **INSPIRES** you and really *captures why* you chose that word to describe your office)
- 3) Put all the images together in the template (pg 6) and that's your mood board!

MOOD BOARD QUESTIONS

- 1) If your office was a drink, what kind of drink would it be?
- 2) Which season would it be?
- 3) Which city would it be?
- 4) If your office was a flower, what kind of flower would it be?
- 5) What kind of landscape would it be?
- 6) What fragrance would it be?

MOOD BOARD TEMPLATES

The perk of a template is that you can change the images around, to find which ones complement each other and make a pretty collage!

SO YOU HAVE YOUR MOOD BOARD...

WHAT'S NEXT?

- 1) Look at what you already have in your work space that connects to the vibe/theme from your mood board.
- 2) Remove anything that doesn't inspire you from your current work space.
- 3) Rearrange. Less is more, focus first on items that best fit with your theme. Get creative about finding other ways to organize or relocate the items you removed i.e. stored in a pretty box or in another closet.
